COPENHAGEN

30 Years of Lighting!

This year we are celebrating three decades of lighting design. It's remarkable to think back to 1994, when a friend and I, both just 18 years old, founded Halo Design by chance during our high school years. Our first brochure listed just three items: 12V halogen bulbs (20 / 35 / 50 watts), which we sourced at a great price. At the time, these bulbs were new and relatively expensive. We managed to get orders to light some shops with a wire system that gave a fresh, clear spotlight effect. From there, we designed our own spotlights for the wire system and soon expanded our creations to include pendants and wall lamps, made with mouth-blown glass from France and specially sourced sockets and cables from Italy, all assembled in our small Copenhagen workshop.

Today, 30 years later, I'm proud that Halo Design is still one of the few privately owned lighting companies in Denmark, and that our designs grace homes and businesses across Europe.

Thank you for being part of this journey and I look forward to celebrating the next chapter with you.

Our values

Danish identity

Founded in 1994 by Danish entrepreneur Michael Waltersdorff at just 18 years old, Halo Design embodies the essence of Danish craftsmanship and innovation. We take pride in our heritage, which is reflected in the quality of our lamps.

Nordic design

Rooted in Nordic traditions, our design philosophy blends classic elements with a modern touch. This approach ensures that our lighting solutions are timeless yet fresh, making them stand out in a global market.

Functionality

We design our lighting solutions with everyday life in mind, integrating practical features that make them not only beautiful but also useful. Our goal is to create lighting that adds value by improving how people interact with their spaces.

Value for money

We believe that great design should be accessible. By balancing aesthetics with practicality, we deliver high-quality lighting at a price that offers true value. Our commitment is to make well-designed products available to a wide audience.

Lighting shapes how we perceive our surroundings and significantly impacts our mood. We believe that creating a positive and cozy atmosphere requires the right lighting to help people feel at ease.

Modern technology allows us to deliver customizable, energy-efficient lighting that can enhance emotional well-being. For this reason, our lamps are designed to be both functional and technically advanced, seamlessly integrating into any space to create a true sense of home.

We Love to Create!

Design is in our DNA. At Halo Design, every lamp is crafted to have a unique character, ensuring it remains functional and timeless for years to come.

PARIS

*Designed by Emanuele Patton & Michael Waltersdorff
with Caroline Bjørn*

Owner and Design Director

Michael Waltersdorff

Born in 1975 in Hellerup, Denmark, he is a self-taught Danish designer. His designs include several classics for Halo Design Copenhagen, which he founded in 1994 at the age of 18.

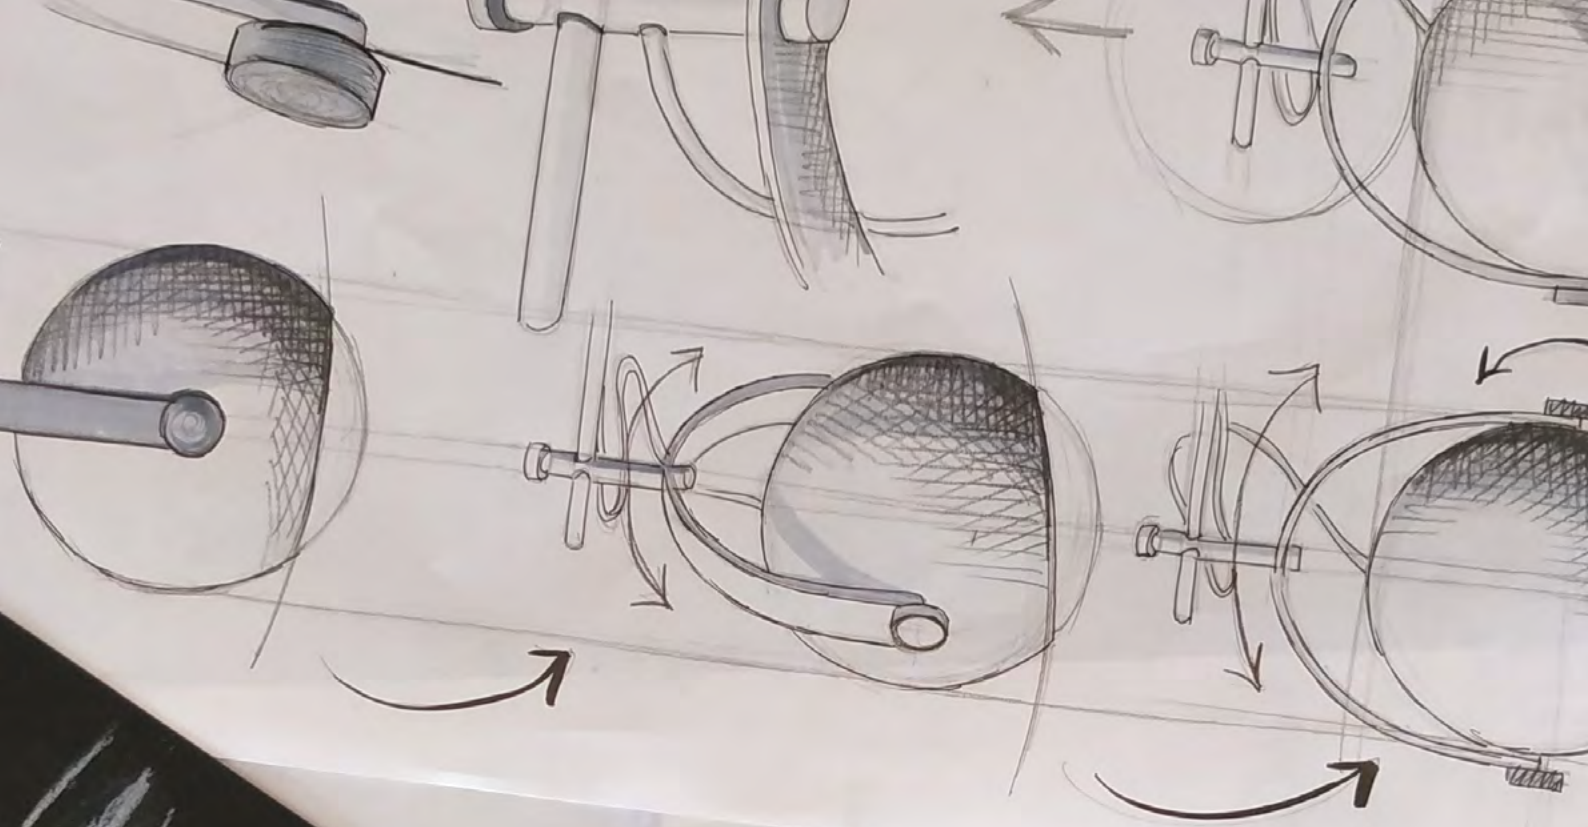

He is the owner and design director of Halo Design, a company that manufactures lamps and light bulbs. His work is distributed throughout Europe.

Designer and Art Director

Emanuele Patton

Born in Trento (Italy) in 1979, he has studied industrial design at the Polytechnic of Milan and at the Royal Danish Academy of Fine Arts of Copenhagen.

He has worked for more than 20 years in design companies in Europe. Since 2017 he has been a permanent employee of Halo Design, where he is involved in both the design of new products and the company's development strategy.

Paris

Paris is truly one of those cities where fashion really happens, both in the streets and at home. For this new family of lamps we've taken inspiration from recent trends, where collections are being designed with pleats of dark and natural tones.

Stockholm Nordic Edition

Aesthetic and material research results in the Stockholm family. With the new Nordic Edition lamps, we wanted to give them a natural look by combining wood with brass.

The lamps also have fine details such as a pivot point on the shade of the pendant models, which is useful for rotating and positioning the lamps as required.

DC Textile

DC is a family of lamps with a simple and Scandinavian inspired design. Thanks to its round shapes and the combination of metal and wood, this range immediately became one of our classics. The veneered oak arch also has a very important function in rotating the shade of the lamps and directing the light freely. Now combining wood, metal and fabric.

All pendant models of the Stockholm series feature a pivoting point on the canopy, useful for rotating and positioning them as desired.

Each Stockholm lamp is a unique object with individual glass decorations. They change their appearance during the day, depending on the situation and the intensity of the light source.

Room 49

This lamp series is the result of a close collaboration with interior designer Christian Bondo Gravesen and has led to the development of a complete range of products with very high build quality, excellent light distribution and refined brass details.

Paris

Paris is truly one of those cities where fashion really happens, both in the streets and at home. For this new family of lamps we've taken inspiration from recent trends, where collections are being designed with pleats of dark and natural tones.

Designed by Emanuele Patton & Michael Waltersdorff with Caroline Bjørn

Baroni

With its beautiful white opal glass and details in brushed metal, the Baroni series is a true classic yet modern at the same time. The high quality of the glass makes sure to obtain a diffuse light that can illuminate in a very effective and decorative way. Baroni is available in various sizes and for different functions: as pendant, table lamp and floor lamp.

Designed by Michael Waltersdorff

Drops

Icicles form when the conditions are right in winter, snow-covered trees and frozen water create the most beautiful drops, from which we drew inspiration for the Drops series in the Nineties. The unique result is thanks to the silky opal mouth blown glass, which is produced by one of the best glass factories in Europe.

Designed by Michael Waltersdorff

Drops Metal

Inspired by its sibling (Drops in opal mouth blown glass) we challenged ourselves to make a classic, yet modern metal pendant. The result was a series of 4 metal wire pendants, with a unique lid in the bottom in brushed copper.

Atom

Halo Design's Atom series is inspired by the structure of atoms and their rotating electrons. An in-depth study of modern lighting needs has resulted in a unique collection of malleable lighting, where each lamp offers the ability to customize its appearance. In this way you can easily and comfortably create the most suitable version for your environment.

DC

DC is a family of lamps with a simple and Scandinavian inspired design. Thanks to its round shapes and the combination of metal and wood, this range immediately became one of our classics. The veneered oak arch also has a very important function in rotating the shade of the lamps and directing the light freely. The details obtained from solid aluminium complete a unique design that is highly appreciated worldwide.

Bodø

The lamps of the Bodø series are deliberately simple and reserved, focusing on details. The soft surface and round shape of the opal glass offers a functional and efficient light reflection.

Bubbles

The apparently simple shape of the Bubbles lamps is actually a deep study of geometry, where proportions are balanced between the three spheres that make up each product. The final appearance offers a play of transparencies and reflections and a wide choice of colors thanks to the combination of different glass and steel element finishes.

Hygge 230V range

Many of our partners have asked us to develop a 230V lamp series based on the success of the portable Hygge lamp. And we have listened to these requests and have created a complete range of lamps, extending and enriching the design behind the original concept with functional details.

Århus

The name of this series was inspired by the city of Århus, often referred to as 'The City of Smiles'. The lamps, in fact, have a shape that recalls a smile in the upper part of the metal cover which makes its appearance unique. The combination of the cylindrical wooden element with the metal cover offers not only an interesting aesthetic but also an additional functionality: the possibility of adjusting the direction of the shade in floor and table lamps.

Dueodde Metal

A curvy shape and the contrast between metal and solid oiled oak wood gives this family of lamps a unique look. The inspiration for the design comes from the hourglass, an object of great charm whose sand was once taken from the Dueodde beach in Bornholm (Denmark).

Dueodde Glass

The original design: organic shapes and high-quality opal glass for this series consisting of three pendant lamps. Dueodde beach is one of the best beaches of Bornholm (Denmark). Its ultra-fine sand has been traditionally used in hourglasses, from where the inspiration was found.

Wrong

Wrong has a curious look that is difficult to express in words. The shape of the mouth blown opal glass is asymmetrical and changes continuously depending on the point of view of the observer, giving the feeling of having several lamps in one. Definitely a family of lamps that must be seen in person to appreciate its aesthetic quality!

Color: Opal, matt grey
Socket: E27, Max 40W excl.
Cable: 200cm textile

Ball Ball

Ball Ball—as the name says this is a combination of two spheres, melted together in a sophisticated mouth blown glass. Ball Ball is an elegant series of 3 glass pendants. The soft round organic edges created by the curves of the glass reflects the light and casts the shadows to the surroundings.

Designed by Michael Waltersdorff

Frame

Frame combines in a compact body a highly efficient light with high quality materials. Details such as the internal fabric shade, the antique brass finish elements and the perforated sides make this family of lamps aesthetically unique.

Halo

The Halo series is the result made by a special laser technique, where the aluminium is crafted with extreme precision. The details are often seen on vintage motorbikes, from where we got our inspirations. The series comes with different combinations and colours and is truly a first mover. We recommend using our range of decorative bulbs, to get the right look as you see from the photos.

Colors Hygge

"Hygge" is much more than a word for the Danes, it is a philosophy and a mindset that makes us one of the happiest countries in the world.

The Dim LED "Hygge" bulb from Colors is created from that concept and it helps remind you to find moments of joy in every day, also the busy one.
